DETAILED ACTION

Allowable Subject Matter

All claims are allowed. Claims 1-15 are allowed. The examiner's reasons for allowance remain as that of the previous Office Action. In addition, Applicant has clarified the claims, thereby clarifying the reasons for allowance.

This (reason for allowance) is repeated and clarified and given more detail at pages 6-7 of the latest Amendment from Applicant. At pages 6-7, each independent claim is mentioned and explained. The closest US Patents (Patent 6,006,200 Boies et al.; Patent 6,055,510 Henrick et al.; Patent 6,128,663 Thomas) do not teach such particular real identity handling in such particular closed system/network in such context of the other limitations of the claims. Pages 6-7 explain the terms and bring the reasonable meanings (by citing and incorporating the specification) in the terms, thereby clarifying the terms and the claims.

Along with other searches, US Patent Examiner's search templates for class 705/14 and 705/27 have been used. In addition to the US patents mentioned in the previous paragraphs, three Non-Patent Literature are noted:

Identity theft solutions disagree on problem; Goth, G.;
Distributed Systems Online, IEEE
Volume 6, Issue 8, Aug. 2005

Personalization through mask marketing; Strasser, M.; Zugenmaier, A.;
System Sciences, 2003. Proceedings of the 36th Annual Hawaii International
Conference on
6-9 Jan 2003 Page(s):8 pp.

Art Unit: 2134

Identity Management and Data Sharing in the European Union; Otjacques et al.;
System Sciences, 2006. HICSS '06. Proceedings of the 39th Annual Hawaii
International Conference on
Volume 4, 04-07 Jan. 2006 Page(s):70a - 70a

While all three deal with identity management or marketing, they do not teach such particular real identity handling in such particular closed system/network in such context of the other limitations of the claims.
